Dear Hiring Manager,

I am writing to express my interest in the IT Quality Assurance Tester or any IT-related position. With 3 years of experience and a Bachelor's degree in Computer Science, I have developed strong skills in manual and automation testing across industries like telecommunications, e-commerce, banking, insurance, and engineering.

My previous role as an ERP/SAP Test User at Nezda Services Inc., deployed to Bosch Service Solutions, Inc., involved independently conducting testing on SF4 and QF4 systems across SIT1, SIT2, and UAT environments. As the only tester based in the Philippines within our team, I quickly adapted to working autonomously, enhancing my problem-solving skills and ability to execute test cases efficiently.

I have a strong foundation in Manual and API / automation testing using Postman, SoapUI, and other API configurations. My keen attention to detail, collaboration skills, and proactive approach ensure high-quality software solutions. Beyond technical expertise, I value teamwork, open communication, and a professional work culture where accountability and respect are upheld. While I work with heart, I believe in setting clear communications to maintain a balanced and productive workplace.

I am eager to contribute my expertise to your team and would love the opportunity to discuss how my skills align with your company's needs. Please feel free to contact me at your convenience.

Thank you for your time and consideration. I look forward to your response.

Kind regards,
MARY JOY A. SAMARITA
